LANGUAGES

- English: Fluent
- SePedi: Fluent
- Afrikaans: Basics

PROFILE SUMMARY

Highly motivated and passionate Backend Developer, driven by the challenge of building robust, scalable systems. While my path didn't include a formal degree, it's fueled a relentless, self-directed pursuit of backend mastery – from APIs to databases to infrastructure. Eager to contribute clean, efficient code and solve complex problems

WORK EXPERIENCE

Fullstack developer   2025 - PRESENT
Personal projects

- **Matric2Uni Web Application**
- Built full-stack solution for students to check university eligibility based on matric results. Developed backend logic with Node.js/Express and MongoDB for data processing. Created responsive frontend with React.js/CSS for intuitive results display.

- **R.W. Fick Senior Secondary School Website**
- Designed and developed a modern frontend website for my former school. Emphasized a clean user experience, mobile responsiveness, and optimized performance. Implemented version control using Git and hosted the project on GitHub.
